

Waste Management Training

2021

Waste Management Legislation Update

Waste Management Training

Introduction

Significant changes have occurred in waste management legislation since 2018. This course updates participants on all the changes to the Waste Management Act in the past three years. Additionally there have been many changes in fifteen other Waste Management Regulations such as collection and facility permits.

Who for

- This one day programme is aimed at personnel who require an updated knowledge of the Act as part of their everyday skill set, including regulators, private waste management operators, consultants or other environmental professionals.
- The 2021 Waste Legislation update is specially designed for those with a grounding in waste legislation and builds on Modules 1 and 2 of the ETS Waste Management course. It builds on the foundation from waste legislation courses up to 2018.

Tutor

Andrew Moag has been successfully delivering waste training and certification programmes on behalf of the EPA and FAS for over 20 years and is widely recognised as an industry expert on the Waste Management Act. His experience as a waste management consultant includes providing expert witness services during court proceedings; assisting the EPA, Local Authorities and private sector waste companies with legal compliance issues and drafting waste legislation. This experience has given him a unique insight into the practical application of the Waste Management Act, which enables him to explain complex legislation using real-life examples in a way that can be easily understood.

Content

- Waste Management (Tyres and Waste Tyres) Regulations 2018
- European Union (Properties of waste which render it hazardous) Regulations 2018
- Waste Management (Landfill Levy) Regulations 2019
- European Union (Waste Electrical and Electronic Equipment) Regulations 2019
- European Union (Waste Licensing) (Amendment) Regulations 2019
- Waste Management (Facility Permit and Registration) (Amendment) Regulations 2019
- European Union (End of Life Vehicles) (Amendment) Regulations 2020
- European Union (Waste Management)(Environmental Impact Assessment) Regulations 2020
- European Union (Restriction of certain hazardous substances equipment) (Amendment no.2)
- European Union (Landfill) Regulations 2020
- European Union (Packaging) Regulations 2020
- European Union (Waste Directive) Regulations 2020
- Circular Economy Bill 2021
- Updates to the Waste Management Act 1996-2020

Courseware

All participants will receive a copy of the specifically developed Consolidated Waste Management Act 1996-2020, developed and maintained by the tutor Andrew Moag since 2004. A full set of comprehensive notes, the current Waste Management Act and all new Waste Management Regulations will bring your Waste Legislation reference library right up to date.

An **ETS** certificate of successful completion of the programme will be issued to participants. The training materials are up-to-date as of 2021.

Programme dates/venues

Refer to ETS website for current dates.

Waste Management Training

Programme Fee

About Environmental Training Solutions

ETS is a specialist provider of environmental training for the public and private sector. The company was formed in 2012 to deliver relevant and focused training for a range of environmental activities. Drawing on a team of internationally experienced trainers, **ETS** provides training in waste, water and environmental regulation.

In addition to developing and delivering general courses, ETS prepares and delivers bespoke programmes for client specific requirements. The company has a growing programme of events that can be reviewed on their website: www.environmentaltraining.ie
